

## **6-months internship at Economics Research Unit SMART-LERECO in Rennes**

### **Brexit: what challenges for the French agricultural and food sectors?**

#### **Setting:**

After the financial crisis, the Greek tumult of the Eurozone, the drop in agricultural prices and the weak economic growth in recent years, the British decision to leave the EU marks a major turning point in history. The Brexit raises many question marks on its implications in terms of policy changes and on the new rules that will govern the EU-UK relationships (trade and investments).

#### **Aims of the internship:**

The aim of the internship is to provide an in-depth overview of agricultural and agri-food trade and investments of France in order to identify the main challenges faced by producers after Brexit. The intern will identify the sectors and product groups most exposed in terms of trade volume, capital in- and out-flows, and job loss or creation. The selected candidate will also carry out a review of the literature on the history of relations between the United Kingdom and its European partners.

#### **Profile:**

Student in economics (master 2)

#### **Competencies:**

International economics, data analysis, accuracy, organization, synthesis and drafting skills in French and English, interest in agricultural and commercial policies.

#### **Place of internship:**

Research unit SMART-LERECO, AGROCAMPUS OUEST - INRA  
4, allée Adolphe Bobierre  
CS 61103  
35 011 Rennes cedex  
France

**Salary:** According to the French regulation (554,40 € gross per month)

**Period:** Starting in March-April 2017 for 6 months.
